

### Japan's Strongest Landfalling Typhoons by Pressure (from 1951 to 2023)

Ranking	Name	Pressure upon landfall	Year	Landfall place
1	Nancy	925	1961	Kochi
2	Vera	929	1959	Wakayama
3	Yancy	930	1993	Kagosima
4	Ruth	935	1951	Kagosima
5	Nanmadol	940	2022	Kagosima
	Mireille	940	1991	Nagasaki
	Trix	940	1971	Kagoshima
	Shirley	940	1965	Kochi
	Wilda	940	1964	Kagoshima
	Louise	940	1955	Kagoshima
	Grace	940	1954	Kagoshima

Data source: JMA

Typhoon is expected to make landfall in Western Japan mid-week, with a pressure of around 950hPa. This area is known as 'typhoon alley,' and it has previously been affected by typhoons with central pressures of 940hPa or less. The majority of these occurred in the mid-1900s.
